Education

Bachelor's degree in Computer Science. Spring 2025- Fall 2027 University of Massachusetts Boston
Coursework: Data Structures (CS 210), Discrete Mathematics (CS 220),
Calculus II (MATH 141), Linear Algebra (MATH 260)
Awards: Transfer Merit Scholarship
Associate's degree in Computer Science. August 2023 Seneca College, Toronto, Canada

Technical Skills

NumPy, Pandas, scikit-learn, Matplotlib, Seaborn, EDA, Regression, Classification, Clustering, Agile, Data Cleaning, Model Evaluation, Data Pipelines, Power BI (basic), SQL, MongoDB, ElephantSQL, Git, GitHub, AWS (basic), Jupyter, VS Code
Programming: Python, R (basic), C, C++, Java, JavaScript, HTML, CSS

Experience

UMass Boston

Data Operations Assistant Feb 2025 – Present
• Analyze and validate institutional datasets in Excel by cross-referencing statistical reports, ensuring data accuracy and consistency
• Perform data cleaning and standardization across reporting tables to improve data quality and reliability for analysis
• Detect and resolve data discrepancies through validation and reconciliation processes
• Maintain and update large-scale tabular datasets, supporting institutional reporting and data-driven decision-making

Break Through Tech AI Program, Cornell Tech + MIT (Ongoing)

AI Fellow May 2025 – Present
• Selected for a competitive, year-long machine learning program led by Cornell Tech and MIT
• Gained hands-on experience across the full machine learning lifecycle, from problem framing and data preparation to model training, evaluation, and deployment
• Built and evaluated supervised machine learning models using scikit-learn, applying metrics such as precision, recall, F1-score, and ROC-AUC to guide model selection
• Applied NLP techniques and vector representations to transform unstructured text into model-ready features
• Integrated trained models into API-based systems, gaining exposure to inference workflows and production considerations
• Collaborated in Agile teams, presenting technical findings and iterating based on peer and instructor feedback

Riverside Community Care, Somerville, MA

Operations Analyst (Promoted from Operations & Data Assistant) October 2023 – December 2025
• Analyzed and maintained client, clinical, and billing datasets within EHR systems to support operational and financial decision-making
• Developed monthly reports on enrollment, service utilization, and expenditures, enabling data-driven program planning and compliance
• Cleaned, validated, and reconciled structured data across systems, improving data integrity and reducing billing discrepancies
• Identified data inconsistencies and optimized data workflows in collaboration with clinical and billing teams
• Digitized and structured medical record datasets, improving data accessibility and retrieval efficiency by 40%
• Analyzed operational data (inventory, scheduling, program usage) to optimize resource allocation, reduce costs by 15%, and decrease client wait times by 30%

Broadway Infosys Nepal

Student Teaching Assistant (Java) June 2021 – February 2022
• Mentored 100+ students in Java programming, debugging, and object-oriented design
• Led hands-on coding workshops and guided students through mini-projects and problem-solving sessions
• Conducted code reviews and debugging walkthroughs, reinforcing core software engineering fundamentals

Projects

AI News Agent — End-to-End NLP System (Break Through Tech AI, Microsoft Partner Project)

<https://github.com/BTTAI-News-AI-Agent/News-AI-Agent>

- Built an end-to-end AI system for news classification, summarization, and question answering using supervised NLP, transformers, and API-based deployment

Adult Census Education Level Prediction <https://github.com/ninapappas/BTT-ML-Project>

- Developed a supervised ML pipeline to predict college degree attainment from U.S. Census data using feature engineering, model tuning, and evaluation

Machine Learning Projects <https://github.com/t-ashriya/BreakthroughTechAI-labs>

- Implemented end-to-end ML workflows across multiple datasets, covering data preprocessing, classical ML, CNNs, model evaluation, and deployment concepts
